

CUSTOM FX

by **AlCARDONE**

In response to the growing popularity of the high-performance tuner market, CARDONE offers **A1 CARDONE CUSTOM FX Calipers**, a division of our Friction Choice line.

CUSTOM FX Calipers are powder-coated for outstanding performance and appearance that are second to none. In addition, CARDONE builds CUSTOM FX Calipers with the excellent quality and reliability you expect.

CUSTOM FX Caliper Highlights:

- 370 SKUs cover popular “tuner” domestic and import applications.
- Most applications are available in a red, black, or yellow powder-coated finish.
- Mounting brackets are installed, where applicable.
- All hardware is included, either installed on the unit or in a packing kit.
- Independent testing proves that CARDONE's exclusive powder-coating, with rust deterrent, lasts longer than leading competitors' and O.E. powder coating, thus ensuring superior performance.

CUSTOM FX Powder Coated Caliper part numbers mirror the Friction Choice program. Although the root part number is the same, CARDONE differentiates powder-coated calipers with an “X” followed by a letter designating the color. An example is part number 191834: Powder-coated red is listed as 191834XR.

See a full list of Custom FX Caliper coverage on the next pages. Applications are listed alphabetically by Make.

POWDER-COATED FRICTION CHOICE CALIPERS (unloaded)
