

MAGNA-PURE®

Stop premature steering system failure and reduce comebacks by up to 40%

with patented Magna-Pure® filtration technology offered exclusively by CARDONE

Debris is a major cause of steering system failure. It travels through the entire steering system, eroding and clogging various components and hoses, leading to expensive repairs. CARDONE offers two solutions to help prevent steering system contamination, ensuring efficient performance and long life.

Magna-Pure Power Steering Pumps

- Patented by-pass filtration technology
- Built-in filter alleviates need for separate in-line filter
- Limited lifetime warranty

Magna-Pure In-Line Power Steering Filters

- Patented by-pass filtration technology
- Serviceable and easy to install
- Upgrades warranty on accompanying CARDONE steering products to limited lifetime

Improved Heavy Duty Steering Gearbox

Problem:

2005-2010 Ford F250/F350 Super Duty Pickup steering gearboxes have been failing at high rates due to piston and shaft teeth damage.

CARDONE Solution:

CARDONE engineers redesigned the gearbox with a more robust piston design and larger sector shaft diameter and teeth profile.

More robust piston design

Larger teeth profile

Larger sector shaft diameter
