

Vehicle Option Codes are made up of numbers and/or letters that give highly detailed information regarding what options or packages were installed on the vehicle at the time of production. Certain systems in the vehicle may have many different options for the same replacement part based on those unique package configurations.

The most common placement of the labels on the vehicle are the driver's side front door jamb or in the glove box. Once you've located your Vehicle Option Code label, you can match up the codes with your application in our catalog to ensure you're selecting the right part for your vehicle.

Cadillac	Code	Ratio	Cover Bolt Count
Escalade	GT4	3.73	10
Escalade	GT5	4.10	10
